## Education

---

Purdue University, School of Technology

2005-2009

BS in Computer Graphics Technology with Minors in *Film & Video Studies* and *Art & Design*

## Skills

---

Over the years I have honed the necessary skills necessary for a career in the fast paced atmosphere of touring production. From managing stagehands and crew to problem solving both production logistics and gear malfunctions on a day to day basis as well as dealing with the psychology of being away from home months at a time. My passions are for cinematography and creating a quality, visually appealing production in order to meet the client's needs by utilizing my abilities to coordinate multi camera shows, build/operate various camera platforms, assemble/map/tech LED surfaces, create/manipulate /implement custom content using the latest software. I pride myself on being up to date with the latest technology and if I don't have the answer to a problem I'll work until I have a viable solution.

[Please inquire for a complete list of gear in my Steadicam package. A manifest is available in PDF form.]
